

## Johnson Screens® Vee-Wire® products

Since 1904 Johnson Screens® has been the world's leading brand in separation and filtration systems. With state of the art manufacturing facilities, our technology in manufacturing Vee-Wire® is unmatched. We have full control over all critical manufacturing steps from start to finish ensuring the highest quality product every time, including slot accuracy and weld integrity.

With a century of design innovation, industry experience and technology know-how behind the Brand; Johnson Screens® have the in-house capabilities to optimise your mineral beneficiation processes.

### Johnson Screens® Sieve Bends

With our leading Vee-Wire® manufacturing technology, we can offer greater cut-point performance.

### Johnson Screens® Flat Panel

Johnson Screens® offer a wide variety of Vee-Wire® screens (often known as Wedge Wire or Profile Wire screens) for particle separation, de-watering, classifying, and related mineral processing applications.

Each intersection of surface wire and internal support rods is welded, producing a very strong screen.

#### Other Wedge Wire products

- Custom screen panels
- Flat Hopper type panels
- Rib Deck angled panels

#### Other Polyurethane products

- Flip flow mats
- Con-slot (Continuous slot)
- Complete set with full accessories
- TIRO panels (for higher slots)
