

Johnson Screens® a century of innovation, experience and know-how behind the Brand.

Johnson Screens® Centrifuge Baskets

Johnson Screens® Centrifuge Baskets combine design innovation, "Fit for Duty" material and world class Vee-Wire®, de-watering and manufacturing technology, to deliver beneficiation process improvements and longer product life cycle solutions to your mineral processing applications.

Salient Features

- Wire & slot tolerance validation.
- Choice of standard or customised Vee-Wire® designed in-house.
- State-of-the-art balancing technology.
- Pre-polish finish, to prevent product hang-up.
- Unrivaled build quality exceeding all quality assurance standards.

Cylindrical Baskets

Cylindrical baskets can be designed for a flow from out to in (standard construction) or from in to out (re-rolled construction). These screens are adapted for self-cleaning filters or screw press filters and can be cleaned with static scrapers.

Features

- Dimensions adaptable to any specific needs
- Large range of constructions (wires, rods)
- All slot sizes from 25µm
- Flanges and reinforcement rings available depending on the application

Benefits

- Self cleaning surface
- High open area
- Strong construction
