

PRODUCT OVERVIEW

AUTHORIZED DISTRIBUTOR OF:

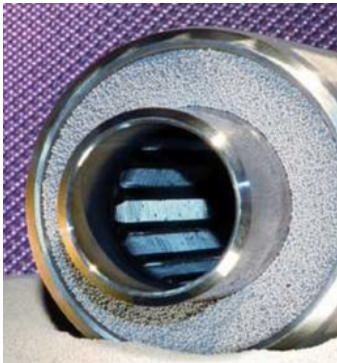

**Johnson
Screens**

WATERWELL SCREENS

Non-clogging, high-strength filters for efficient groundwater extraction.

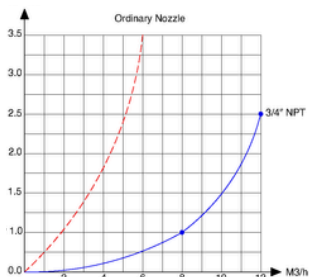

MUNI-PAK SCREENS

Muni-Pak screens simplify gravel packing, reduce drilling time, and lower long-term well maintenance.

FILTER NOZZLE NYLON

Fine Screening and Filtration featuring Nylon Caps

Technical data

Material	Nylon
Overall Length	100 mm
Maximum Temperature	120° Celcius

HEADER LATERAL

Type 304 stainless steel, Laterals can attach to headers or hubs.

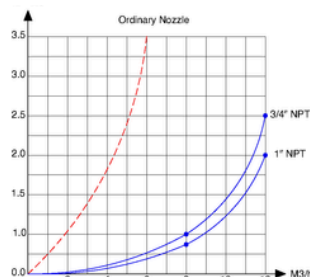

PIPE-BASE SCREENS

Screens combine pipe strength with continuous slot efficiency for high-collapse resistance.

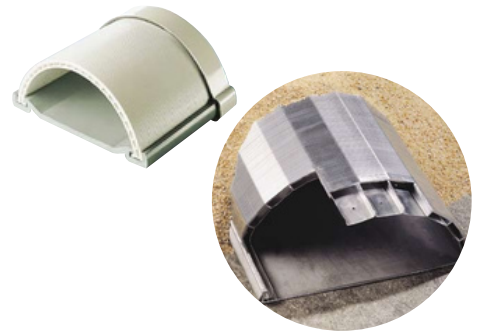

FILTER NOZZLE STAINLESS STEEL

Type 304 and 316 stainless steel high quality nozzles.

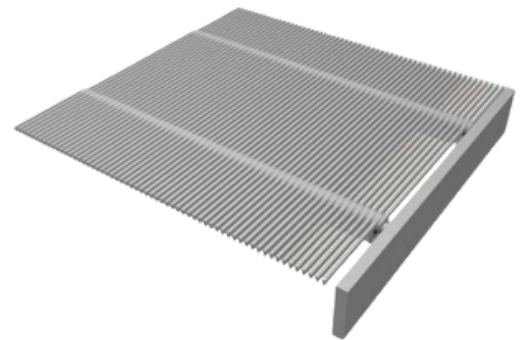

Technical data

Material	SS 304 / SS 316
Overall Length	90 mm
Maximum Temperature	300° Celcius

UNDERDRAIN SCREENS

Triton Underdrains' exceptional performance as a filter underdrain system

FLAT/BAR SCREENS

Flat/Bar screens use small or large wires for fine or heavy-duty screening, with slot sizes customized to the application.

RESIN TRAPS

Provide inline protection by capturing media particles of any size and preventing media loss.

INTAKE SCREENS

Intakes for drinking water plants, fish hatcheries, industrial process water, power plant, desalination & many more

TRASH RACK SCREENS

Medium to coarse trash raking system. Ensure optimal performance

CONICAL SCREENS

High Speed spinning screens designed with best balancing capabilities

AUTOMATIC CLEANING STRAINER

Protect your pump and process equipment with Automatic Cleaning Strainer

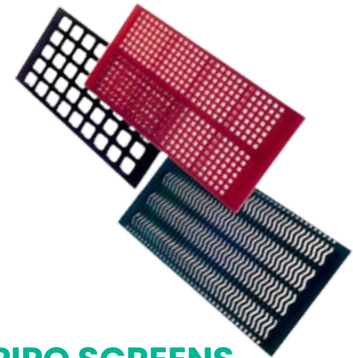

DRUM SCREENS

Drum rotary screen is a self-cleaning, in-channel, semi-submerged rotary fine screen.

VIBRATING SCREENS

Efficient, customizable material separation with low maintenance and compact design.

PIPO SCREENS

This modular screen system has set the standard for the twenty first century.

AUTO CLEANING DSM SCREENS

Used for fine solids separation. The slurry is continuously pressure-fed onto the Vee-Wire screens.

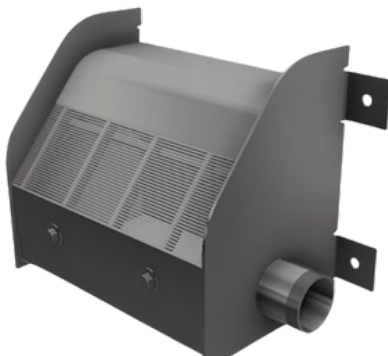

DSM/SIEVE BAND SCREENS

Sieve bands are used as static screens or screening and dewatering applications.

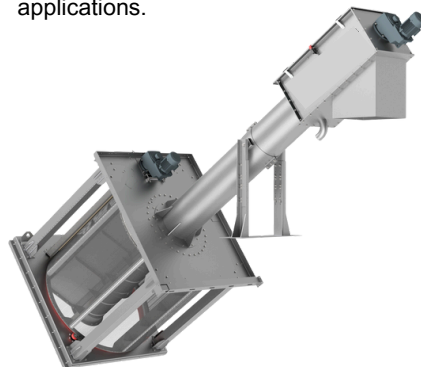

SCREW PRESS

Remove free liquid from sludge. Applicable for wide range of dewatering applications.

COANDA SCREENS

Most economical and effective screen for manual intake screen in water dam or canal.

SCREW DRUM SCREENS

Archimedeian Screw Pumps are a versatile and efficient choice for simple designed pumping large volumes of trash with very fine screening.

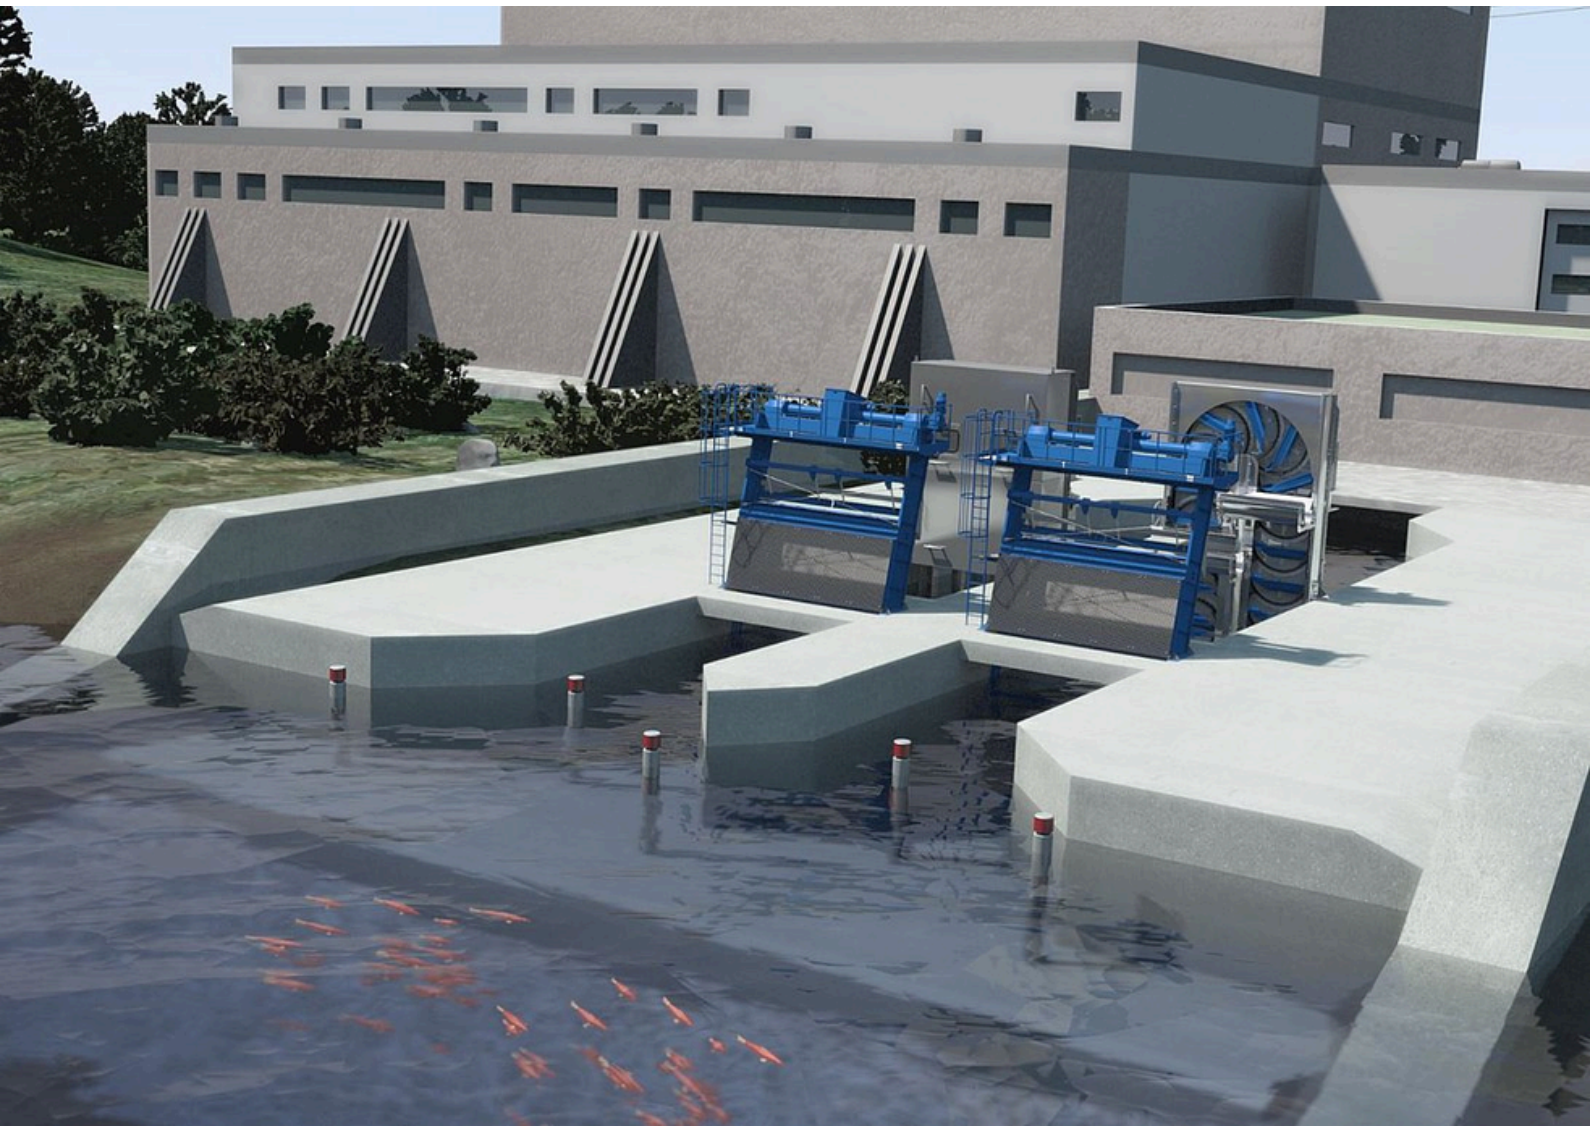

MANUAL BASKET SCREENS

Cylindrical basket screens adapted for simple screening and easy installation.
